Summary

Frontend Engineer with 4 years of experience delivering business-critical web solutions using React, Vue, Next.js, and JavaScript. Proficient in modern UI libraries, reusable component design, and code migration. Experienced in Agile collaboration, team mentoring, feature development environment, and delivery across complex platforms.

Skills

Frontend: React.js, Vue.js, JavaScript, Typescript, Next.js, Redux, HTML5, CSS3, Bootstrap, Material UI, TailwindCSS

APIs and Databases: REST API, Firebase Firestore, basic SQL

Development Tools: Git, VS Code, Postman, Swagger, Figma

Methodologies: Micro-frontend, Test-driven development (TDD), UI design principles, Agile & SCRUM

Experience

Frontend Engineer 1 (SDE-1), Cavista Technology (Axxess) – Pune, India Mar 2023 – Present

- Worked on Vue.js and React.js projects and developed features actively used by 5,000+ users daily across the USA.
- Implemented reusable functional components, common utilities, optimized key screens and migrated 40% of legacy code to modern UI.
- Mentored and led a frontend team of 7 engineers distributed across the globe.
- Resolved critical bugs, reviewed PRs and refactored code resulting in a 30% reduction in client-reported issues and hotfixes and a ~50% improvement in bug resolution time.
- Collaborated with product managers, analysts, and 6+ cross-functional teams to gather requirements and streamline a smooth development and deployment process.

Associate Engineer Frontend, Xoriant – Pune, India Aug 2021 – Mar 2023

- Built a React.js app from scratch for a U.S. client covering both user and admin portals utilised by 10+ agencies.
- Delivered 5+ UI screens from Figma, managed Redux state, used React Hooks, and ensured clean, maintainable code.
- Showcased feature demos to clients on behalf of the engineering team, reducing revision cycles by ~25%.
- Performed unit testing, UAT testing, and applied quick bug fixes, ensuring 100% on-time delivery across sprints.

Personal Projects

Rent Management System (next.js) [github.com/RentManagement](https://github.com/OmkarSavalkar/RentManagement)

- Created a mobile-first Rent Management System for personal use with Next.js, Firebase Firestore, and TailwindCSS, featuring responsive UI and practical real-world usability.
- Designed and executed logic to manage 4 renter profiles, calculate rent, update meter readings, save rent records, and generate editable rent messages for quick sharing via WhatsApp or SMS.
- Added complete CRUD functionality for renter profiles and rent history with error-handled Firestore operations.

Personal Portfolio (react.js) [github.com/MyPortfolio](https://github.com/OmkarSavalkar/MyPortfolio)

Tic Tac Toe game (react.js) [github.com/TicTacToe](https://github.com/OmkarSavalkar/TicTacToe)

Connect Well (next.js, node.js) [github.com/ConnectWell](https://github.com/OmkarSavalkar/ConnectWell)

Certifications

Agile Scrum Mastery: Certified Scrum Master and Project Management - Udemy

Frontend Development (React Js) - Great Learning

Education

Pune University – Bachelor of Engineering in Computer Science Engineering

July 2021
